# GUSignal Software - Download and Installation

Download GUSignal

1. Download the document: "Model_GUSignal" and the zip file: "Model_GUSignal.prj" attached.
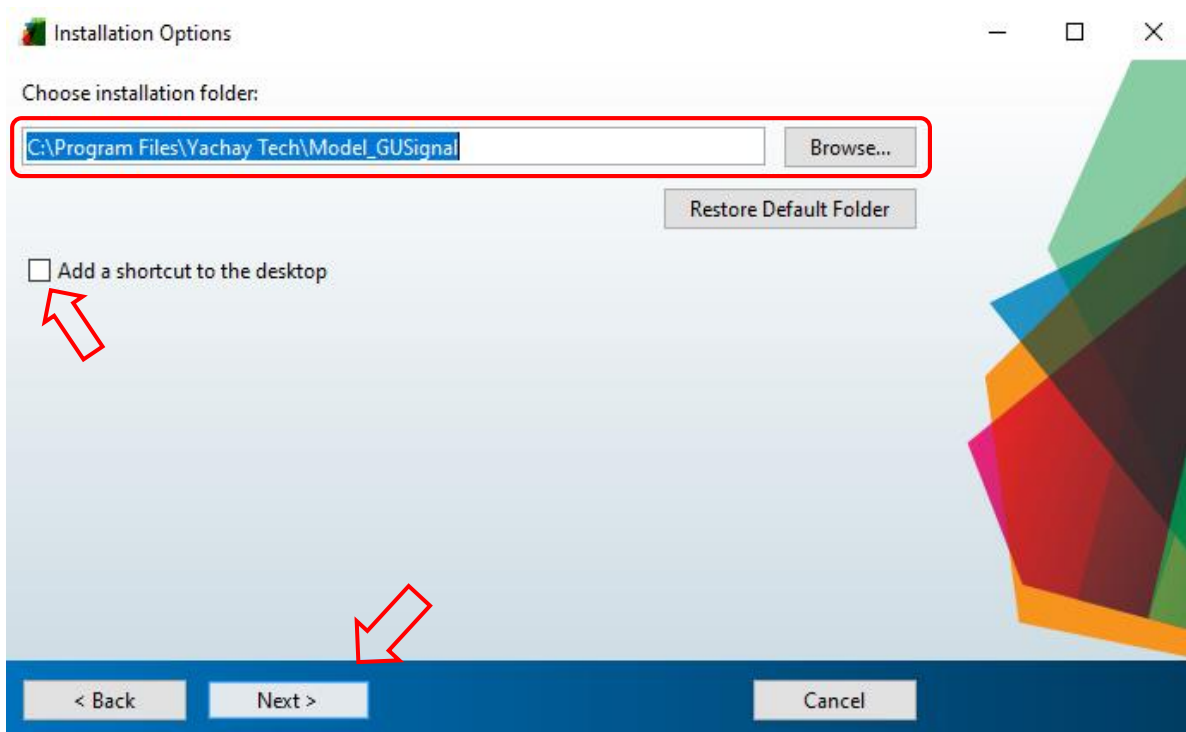

Install GUSignal

1. Unzip the file "Model_GUSignal".
2. Open the folder "Model_GUSignal".
3. Open the folder "for_redistribution".
4. Double click on "MyAppInstaller_web". This will start the installation.

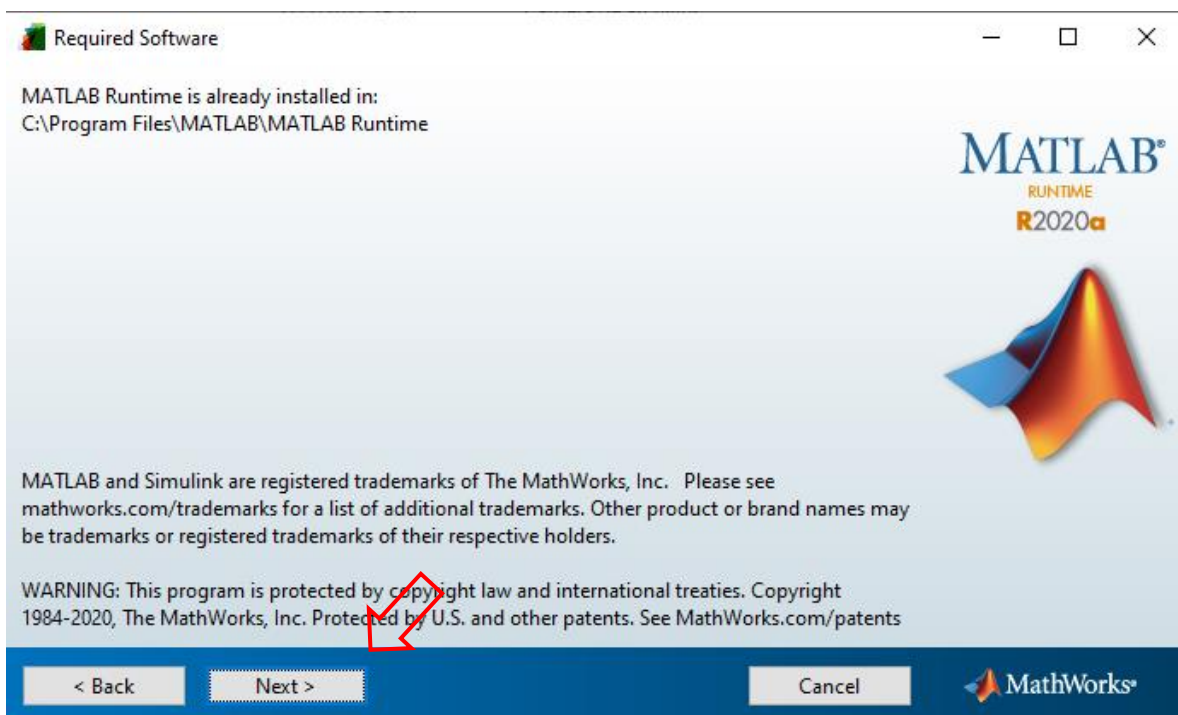

5. A window with the software description appears. Click on "Next".

6. Choose installation folder and click on "Next". It is advisable to select the option "Add a shortcut to the desktop".

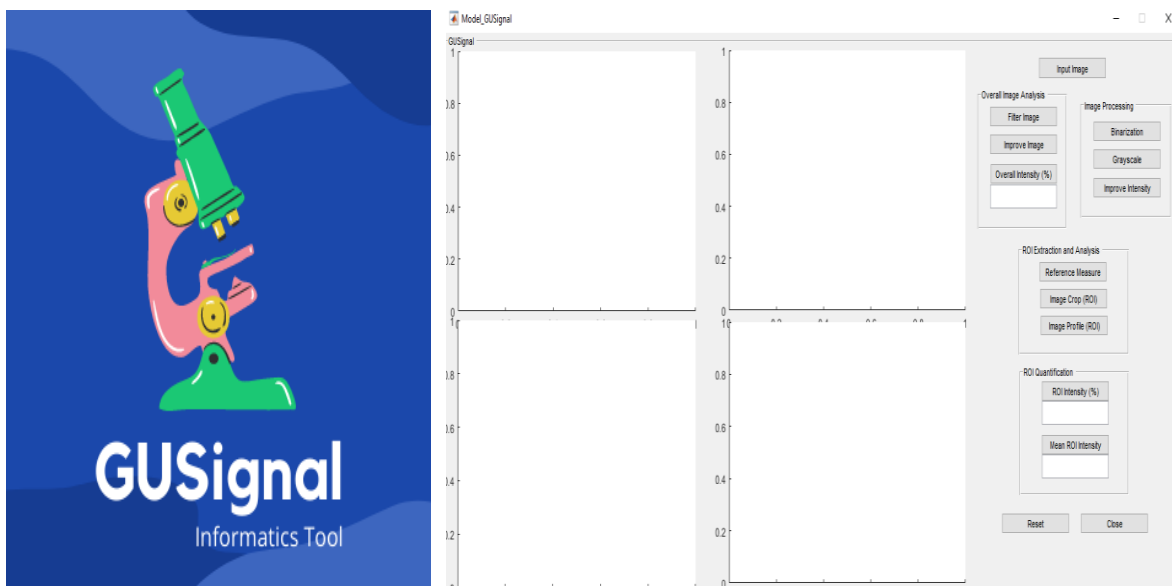

7. A window with the required software "MATLAB Runtime" appears. Click on "Next".

8. The installation will start and when it is finished, click on "Finish".

9. Finally, open the "Model_GUSignal" folder, open the "for_redistribution_files_only" folder and open the "Model_GUSignal" application. If you select the option "Add a shortcut to the desktop" in the step 5, can go to the desktop and open the "Model_GUSignal" application directly.

***Note:** Continue to folder 3: "Software Management Instructions".*
